

Your donations can help one of Safari's own breathe easier every day!

And one day lead to a much needed cure for this very special 3 year old & many other children & adults living with Cystic Fibrosis

This is JASON, a 3 year old at Safari in Cary, Illinois. He lives with Cystic Fibrosis, a life threatening disease that affects the lungs & digestive system. In addition to the frequent lung infections, hospitalizations & severe long term risks & affects of CF, Jason has to take over 37 pills & inhaled medications along with breathing treatments & airway clearance therapy each day.

The CF Foundation is working hard to find better treatments and, hopefully, one day a cure!

All donations are tax deductible

To learn more about Cystic Fibrosis visit www.cff.org
